

# KEEPER SLEEPER

*Around the Clock Care for Your Loved One*

When a loved one needs around the clock, 24/7 care, Comfort Keepers can help. The Keeper Sleeper package provides family and friends with true peace of mind, as our caregivers move into the home to administer a full range of in-home care and respite services tailored to suit your needs and complement existing medical support services.

Caring for your loved one as if a member of their own family, the Keeper Sleeper package allows those in need to enjoy the comfort and peace of mind of knowing that they are safe and sound in their own home.

## About the Package

This package has been designed to provide tailored 24/7 in-home care.

## Your Comfort Keeper will be

- A 24/7 Caregiver - to manage visitors and respond to all client needs
- A Housekeeper - to conduct light housework and laundry
- A Transport Resource - for medical appointments, shopping and errands
- A Reminder Service - for medications and appointments
- A Shower Assistant - extra help for all personal care
- A Cook - to prepare nutritious meals aligned with special requirements
- A Communicator - to provide regular updates to family

## How it Works

Following a free in-home assessment, a personal 'Keeper Sleeper' care plan will be prepared. Your Comfort Keeper will then arrange a suitable time to commence the service. A regular feedback system and continuous improvement process will also be implemented to support the package.

## About Our Caregivers

Each Comfort Keeper is carefully selected, screened and trained to provide the best service possible. From extensive background checks to ongoing training, we strive to offer the very best Comfort Keeper for any specific situation. Comfort Keepers' Caregivers are police and credit checked, insured and covered by Workers' Compensation.

## Our Interactive Care Model

Comfort Keepers adopts and encourages a model of Interactive Care, which focuses on a person's ability to perform their activities of daily living (ADL) with proactive assistance and encouragement from their caregiver, rather than total dependence and reliance for all day-to-day activities. This approach is fundamental to maintaining independence and dignity.
